

FEATURES

- All products are covered by the Pressure Equipment Directive 97/23/EC and are suitable for group 1 and 2 fluids
- The solenoid valves will withstand the severe service encountered in controlling cryogenic fluids, such as liquid oxygen (-183°C), liquid argon (-186°C) and liquid nitrogen (-196°C)
- Solenoid valves require a minimum pressure differential of 0,35 bar
- All valves are degreased, cleaned, tested and packed to keep them free from moisture. In addition, liquid oxygen (LOX) valves are 'black light' tested to check for any hydrocarbons
- Heavy duty floating piston design for severe applications
- The solenoid valves satisfy all relevant EC directives
