

FEATURES

- The valves are certified according to IEC 61508 Functional Safety data and have SIL-3 capability (Exida certification)
- The solenoid valves are recommended for pilot applications with high flow, wide pressure ranges and no minimum operating pressure
- Coils used in metal enclosures have class H insulation materials
- The core movement is guided to ensure optimal alignment. The special low friction seal accomplishes a balanced construction at the specified temperature and pressure range at minimum power levels
- Special rider rings eliminate sticking and provide exceptional service life
- No minimum operating pressure required
- Pressure can be applied at any port
- 316L stainless steel construction for highly corrosive atmospheres
- The solenoid valves satisfy all relevant EC Directives
- Manual Operators are optional including an under pressure removable type

GENERAL

Differential pressure 0 - 10 bar [1 bar = 100kPa]
Response times < 100 ms

fluids (*)	temperature range (TS)	seal materials (*)
air, inert gas	- 25 to + 60°C - 10 to + 90°C - 50 to + 60°C	NBR (nitrile) FPM (fluoroelastomer) (F)VMQ ((fluoro)silicone)

MATERIALS IN CONTACT WITH FLUID

(*) Ensure that the compatibility of the fluids in contact with the materials is verified

	Brass body	Stainless steel body

PRODUCT SELECTION GUIDE

STEP 1

Select the fluid temperature range and seal material from the general table on page 1. Select, based on the selected seal material (if applicable), the basic catalogue number. Also select the pipe thread identification letter.

Example: G327A607

STEP 2

Select prefix (combination): Select the appropriate operator from the prefix table on the left. Select for this operator in the electrical characteristics table on page 3: the power level (LP,RP,MP,BP) the type of electrical enclosure protection and the desired temperature class.

Warning: the ambient temperature range of your application may not exceed the temperature range of your operator (see also on page 3 the section: Explanation of temperature ranges of solenoid valves).

Example: SC G327A607

STEP 3

Select suffix (combination) if required. Refer to the suffix table on the left.

Example: VMS

STEP 4

Select voltage. Refer to standard voltages on page 3.

Example: 230V / 50Hz

STEP 5

Final catalogue / ordering number.

Example:

SC G327A607 VMS 230V / 50 Hz

EXPLANATION OF TEMPERATURE RANGES OF SOLENOID VALVES

Valve temperature range The valve temperature range (TS) is determined by the selected seal material, the temperature range for proper operation of the valve and sometimes by the fluid (e.g. steam)

Operator ambient temperature range The operator ambient temperature range is determined by the selected power level and the safety code

Total temperature range The temperature range of the complete solenoid valve is determined by the limitations of both temperature ranges above

ELECTRICAL CHARACTERISTICS

Coil insulation class H

Electrical safety IEC 335

Standard voltages DC (=) 24V - 48V; Allowable voltage variation ± 10%

 AC (~) 24V - 48V - 115V - 230V/50/60Hz; Other voltages are available on request

ELECTRICAL CONNECTIONS

prefix	connection
SC	Spade plug connector with cable gland EN175301-803A (ISO 4400) for cables with an outer diameter from 6 to 10 mm
WP, WS, EM, WSEM	M20 plastics cable gland for cables with an outer diameter from 7 to 12 mm.
WSCREM	M20 316 SS cable gland for cables with an outer diameter from 7,2 to 11,7 mm.
NF, WSNF, WSCR	1/2" NPT threaded cable entry. Enclosures are supplied without cable gland
NFET, WSNFET	M20 x 1,5 threaded cable entry. Enclosures are supplied without cable gland

ADDITIONAL OPTIONS

- Manual operator MO (push type) and MS (screw type)
- 3/8" pipe thread execution
- 1/2" NPT (prefix "T") and M20 x 1,5 (prefix "ET") conduits (aluminium or 316 SS) available for steel solenoid housing
- Solid state components for peak voltage suppression and/or rectification
- For manual reset type see page PIC-11-25
- Manual Operators are available as shown on page 5

INSTALLATION

- Multi language installation/maintenance instructions are included with each valve
- The solenoid valves can be mounted in any position without affecting operation
- The mounting holes are provided in the valve body
- Threaded pipe connection identifier is 8 = NPT (ANSI 1.20.3); G = G (ISO 228/1)
- Declarations of conformity are available on request
